DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 4/6/2001 (paper no. 4) has been considered.

Claim Objections

2. Claims 5-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 4. See MPEP § 608.01(n). Accordingly, the claims 5-11 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "the vertical direction of said iii" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim. In addition, it is unclear what is meant by "the vertical direction of said iii".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1 are rejected under 35 U.S.C. 102(e) as being anticipated by Irube et al. (US PAT. 6,377,818 hereinafter Irube).

Regarding claim 1, Irube discloses a portable communication terminal apparatus as shown in figure 1 comprising image pick-up means (4) for picking up an image of an object and generating a transmit picture signal according to the image of the object (col. 5 line 64 through col. 6 line 6), communication means (17) for transmitting and receiving the transmit picture signal and a receive picture signal (col. 4 lines 33-51), display means (14) for displaying video information based on the receive picture signal received from the communication means (col. 4 lines 16-25), detecting means for detect an orientation of the portable communication terminal apparatus (col. 21 line 60 through col. 22 line 26) and rotating means for rotating the orientation of the image in at least either of the transmit picture signal and the receive picture signal (col. 22 lines 27-42).

Regarding claims 2-3, Irube clearly discloses the detector means for detecting the orientation of the portable communication terminal apparatus having image pick-up direction

Art Unit: 2643

detector means and display direction detector means for detecting the vertical direction of the display means (col. 22 lines 4-26).

Regarding claim 4, Irube teaches to perform rotation processing on the transmit picture signal based on the orientation of the portable communication terminal apparatus (figures 24-25 and col. 22 line 43 through col.23 line 65).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harris et al. (US PAT. 6,009,336) discloses a communication device including two housings and a latch for detachably coupling two housings and permitting rotation of one housing with respect to another (figures 12-13 and col. 11 line 39 through col. 12 line 37).
